HOW TO USE THIS CHART

To determine the type of placard applied to car—follow vertical line down and note which lines apply by "X" shown in box

*** NOTE ***

Cars with same placards may be placed next to each other.

Footnotes:

- ① A flatcar equipped with permanently attached ends of rigid construction is considered to be an open-top car.
 ② A loaded flatcar, other than a specially equipped car in trailer-on-flat-car or container-on-flat-car service or a flatcar loaded with vehicles secured by means of a device designed for that purpose and permanently installed on the flatcar, and of a type generally accepted for handling in interchange be-

tween railroads. This exception for cars in trailer-on-flatcar service does not apply to loaded flatbed trucks, loaded flatbed trailers, loaded open-top trailers, or loaded trucks or trailers without securely closed doors.

- ③ An open-top car when any of the lading protrudes beyond the car ends or when any of the lading extending above the car ends is beyond the car ends.

- ④ A rail car placarded "EXPLOSIVES A" or "POISON GAS" in a moving or standing train must be next to and ahead of any car occupied by the guards or technical escorts accompanying this car. However, if a car occupied with a lighted heater or stove, it must be the fourth car behind any car requiring "EXPLOSIVE A" placards.

**MAINTENANCE OF WAY
CONDITIONAL STOP
(Form Y Train Order)**

The following forms of oral authorization by the Foreman and acknowledgment of understanding by the engineer are to be used to permit trains to pass a red flag without stopping within the limits of a Form Y train order.

Foreman will state: "Burlington Northern Railway Foreman calling Extra 232 East about Order No. (Form Y Train Order No.)"

Engineer must respond, identifying his train as: "This is Burlington Northern engineer, Extra 232 East."

When engineer has answered as above, the foreman will state: "Extra 232 East may pass red signal at (Mile Post Location and specify Track involved) without stopping."

The foreman may also authorize a different speed from that shown in the Form Y train order by adding to his instructions: "Proceed at _____ MPH," or "Proceed at normal speed."

The engineer must repeat back to the foreman the instructions that are given him.
