WE BELIEVE

. . . . that accidents are conceived in improper attitudes, and born in moments of action without thought. They will cease to be only when the proper attitude is strong enough to precede the act - when the right attitude creates the awareness that controls the act.

HOUSEKEEPING means SAFEKEEPING
A place for Everything and Everything in its place.

To live life successfully and to the fullest, you have to:
Plan it
Organize it
Approach it with a Positive Mental Attitude . . .
with Confidence, Discipline and Determination . . .
to make it happen.
IT'S UP TO YOU!

NORTHWARD TRAINS ARE SUPERIOR TO SOUTHWARD TRAINS OF THE SAME CLASS.

BN Radio Channel No. 2 in service on this Subdivision.

If a safety program is to function well, three things are indispensable:

- 1. There must be an attitude for safety.**
- 2. Knowledge of safety measures and practices must be developed.**
- 3. The physical environment must be kept as free as possible of hazards to safety.**

	RADIOACTIVE	X	X	X				X
	UNDEVELOPED FILM					X		
	EMPTY PLACARDED TANK CARS							
	ANY LOADED PLACARDED CAR (EXCEPT COMBUSTIBLE)	X	X			X		

HOW TO USE THIS CHART
To determine the type of placard applied to car- follow vertical line down and note which lines apply by "X" shown in box

***** NOTE *****
Cars with same placards may be placed next to each other.

Footnotes:

① A flatcar equipped with permanently attached ends of rigid construction is considered to be an open top car.
② A loaded flatcar, other than a specially equipped car in trailer-on-flat-car or container-on flatcar service or a flatcar loaded with vehicles secured by means of a device designed for that purpose and permanently installed on the flatcar, and of a type generally accepted for handling in interchange be-

tween railroads. This exception for cars in trailer-on flatcar service does not apply to loaded flatbed trucks, loaded flatbed trailers, loaded open-top trailers, or loaded trucks or trailers without securely closed doors.
③ An open top car when any of the lading protrudes beyond the car ends or when any of the lading extending above the car ends is beyond the car ends.

④ A rail car placarded "EXPLOSIVES A" or "POISON GAS" in a moving or standing train must be next to and ahead of any car occupied by the guards or technical escorts accompanying this car. However, if a car occupied with a lighted heater or stove, it must be the fourth car behind any car requiring "EXPLOSIVE A" placards.

**MAINTENANCE OF WAY
CONDITIONAL STOP
(Form Y Train Order)**

The following forms of oral authorization by the Foreman and acknowledgment of understanding by the engineer are to be used to permit trains to pass a red flag without stopping within the limits of a Form Y train order.

Foreman will state: "Burlington Northern Foreman calling Extra 232 East about Order No. (Form Y Train Order No.)"

Engineer must respond, identifying his train as: "This is Burlington Northern engineer, Extra 232 East."

When engineer has answered as above, the foreman will state: "Extra 232 East may pass red signal at (Mile Post Location and specify Track involved) without stopping."

The foreman may also authorize a different speed from that shown in the Form Y train order by adding to his instructions: "Proceed at _____ MPH," or "Proceed at normal speed."

The engineer must repeat back to the foreman the instructions that are given him.
